

Nursing RN-BS

Degree Offered: Bachelor of Science

If you are a registered nurse interested in personal development or career mobility, Daemen's RN-BS program is for you. Daemen College's upper division nursing program is designed especially to meet the varied needs of the professional registered nurse.

Daemen's flexible program affords you several options when it comes to taking classes.

Take the opportunity to complete some graduate courses at a reduced rate. RN-BS students may take up to 6 credits of graduate courses at the already reduced undergraduate rate while completing their BS.

Career Options:

The courses in leadership, evidence-based practice, population health, and health care policy all shape the professional nurse. Nurses who have a Bachelor of Science degree increase their mobility within an organization and have additional opportunities for employment including new career options in administrative, research, management, and leadership positions in a variety of settings.

Why Nursing RN-BS @ Daemen?

- Flexible course schedule to allow for either full or part-time study
- Courses offered in multiple formats including online
- Liberal credit transfer policies. Students are able to transfer in both science and elective credits
- Individualized attention from faculty
- Personalized academic advisement
- Financial assistance earmarked for nurses
- Innovative curriculum, building on previous education and experience
- Course offerings in fall, spring and summer so students can begin at any time
- Compact, easily accessible campus
- Program meets BS in 10 Legalization requirement

This program allows you to complete degree requirements in as little as 12 months or two semesters of full time study depending on the number of non-nursing courses needed. You and your academic advisor can arrange the program to meet your individual needs as a working professional.

You'll find many students already enrolled in Daemen's upper division program have several years of professional experience and college courses to their credit. Most of them are returning for their degree while they continue to hold professional positions in their local healthcare community. Many also have the added responsibility of household and family commitments.

No matter what your particular situation, Daemen's program is flexible enough to meet your individual needs.

Accredited by the Accreditation Commission for Education in Nursing (ACEN), 3343 Peachtree Rd. NE, Suite 850, Atlanta, GA 30326 404-975-5000

Daemen's Nursing RN-BS Program is Flexible for Working Professional Nurses

Scheduling: All nursing courses are offered in an online format, making it possible for you to complete the course in the comfort of your own home, on your own schedule. You can choose to complete the RN to BS program fully online.

All nursing courses are also offered in a hybrid format with five on-campus classes spread over the course of the semester and the rest online. All non-nursing courses are offered either online or in three-hour time blocks one day or evening per week.

Of course, part-time schedules are also available; in fact, each semester the RN meets with a nursing advisor to select the courses which best meet the nurse's needs for the upcoming semester.

Tuition Grants: Generous tuition grants for registered nurses are available, which underwrite 50% of tuition. These grants are not based on financial need, and are guaranteed through completion of BS degree requirements.

Experienced Faculty: All nursing faculty at Daemen have special expertise in teaching and advising adult learners, and are readily available to counsel and support the RN's quest for a BS degree.

*did you
know...*

Daemen now offers two formats for attaining a BS in Nursing. All classes are offered as totally online or hybrid formats, allowing for greater flexibility.

Admissions Requirements:

Applicants are considered on an ongoing basis. In addition to a completed application, the following are required for admission:

- Official transcripts from previously attended schools, colleges, and/or universities
- Evidence of RN licensure or eligibility to take the RN licensure exam
- Immunization records
